Graphs and tables on the reverse of this certificate show the spreading widths at which this machine can operate with various products, whilst achieving the industry standard for uniformity of spread. For fertiliser products the standard is a coefficient of variation (CoV) of 15% or under and for lime and gypsum the CoV is 25% or under.

The AFSA professional certification presents the results of independent testing using the AFSA Accu-Spread program and methodology, to the highest possible standard.
